

Soil MANIFESTO

HEALTHY SOIL, a living dynamic ecosystem, is the FOUNDATION of life on Earth. It is the basis for sustainable and productive agriculture. It is the world's greatest terrestrial CARBON SINK and freshwater reservoir. And it plays a crucial role in regulating the **CLIMATE**.

Through regenerating soil we can address the current **CLIMATE CRISIS**, as well as food and water crises, and secure a **PROSPEROUS** and **PEACEFUL FUTURE** for all generations.

We URGE global leaders to JOIN US in PROCLAIMING an **UTMOST COMMITMENT** to protecting, preserving, nurturing, honoring, cherishing, defending, and above all, **REGENERATING SOIL**

GLOBAL LEADERS - Please TAKE ACTION and include regenerative SOIL practices in the universal CLIMATE AGREEMENT.

We are in this together.
